SUMMARY

Final year Electrical Engineering student with experience building and deploying scalable full-stack web applications using the MERN stack. Skilled in developing REST APIs, implementing JWT Authentication, Role-Based Access Control (RBAC), MongoDB schema design, and cloud deployment using React.js, Node.js, Express.js, and MongoDB. Passionate about backend engineering and building scalable software that solves real-world problems.

EDUCATION

Heritage Institute of Technology

2023 – 2027

Bachelor of Technology in Electrical Engineering

EXPERIENCE

BodEase — (Client Project) Frontend Developer | [Live Demo](#) | [Source Code](#)

Jul 2025 | Remote

Tech Stack: React.js, Tailwind CSS

- Developed a responsive 4-page client website using **React.js and Tailwind CSS** with a component-based architecture for maintainability and scalability.
- Built 3 reusable UI components including the navigation bar, footer, and carousel, ensuring a consistent user experience across all 4 pages while incorporating iterative client feedback.
- Optimized frontend performance, achieving a **Lighthouse Performance Score of 97**, and deployed the application on **Vercel**.

PROJECTS

GearBazar — Full Stack E-Commerce Platform | [Live Demo](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS, Cloudinary

- Designed and launched a production-ready **B2B auto-parts marketplace** with **3 role-based portals (Buyer, Seller, and Admin)**, owning the complete frontend, backend, database design, and deployment.
- Implemented secure **JWT Authentication, Role-Based Access Control (RBAC)**, protected routes, and authorization middleware to enable role-specific access across the platform.
- Built end-to-end commerce workflows including **Product Catalog, Vehicle Compatibility Search, Cart, Checkout, Order Management, Seller Approval, and Product Approval** using **React.js, Express.js, MongoDB, and REST APIs**.
- Designed scalable **MongoDB schemas** and implemented **snapshot-based order integrity** to preserve historical product and seller information after catalog updates.
- Integrated **Cloudinary** for image uploads and optimized frontend performance, achieving a **Lighthouse Performance Score of 97** through asset optimization, lazy loading, and responsive UI design.
- Deployed the application on **Render** and **Vercel** with environment-based configuration, centralized error handling, and production-ready API architecture.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, Python

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend & APIs: Node.js, Express.js, REST APIs

Database & ODM: MongoDB, Mongoose

Authentication: JWT, Role-Based Access Control (RBAC)

Core CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS

Cloud Deployment: Vercel, Render, Cloudinary

Tools: Git, GitHub, Postman
