SUMMARY

Final year Electrical Engineering student with hands-on experience building and deploying full-stack web applications using the MERN stack. Strong foundation in React.js, Node.js, Express.js, MongoDB and REST APIs with practical experience in **Authentication, Role-Based Access Control (RBAC), Cloud Deployment and Scalable Backend Design**. Passionate about software engineering and actively seeking opportunities to build impactful products and solve real-world problems.

EDUCATION

Heritage Institute of Technology

2023 – 2027

Bachelor of Technology in Electrical Engineering

EXPERIENCE

BodEase — (Client Project) Frontend Developer |  [Live Demo](#) |  [Source Code](#) July 2025 (Remote)

● **Tech Stack:** React.js, Tailwind CSS

- Developed a responsive client website using **React.js and Tailwind CSS**.
- Built reusable UI components and deployed the application on Vercel while collaborating directly with client requirements.
- Deployed on **Vercel** and handled iterative client feedback cycles.

PROJECTS

GearBazar — Full Stack Developer |  [Live Demo](#)

● **Tech Stack:** React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS, Cloudinary

- Designed and launched a production-ready **B2B auto-parts marketplace** featuring dedicated **Buyer, Seller and Admin** portals with complete frontend, backend and deployment ownership.
- Implemented secure **JWT Authentication** and **Role-Based Access Control (RBAC)** with protected routes and APIs for buyers, sellers and administrators.
- Built end-to-end commerce workflows including **Product Catalog, Vehicle Compatibility Search, Cart, Checkout and Order Management** using **React.js, Express.js and MongoDB**.
- Designed scalable MongoDB schemas and implemented **snapshot-based order integrity** to preserve product and seller information even after catalog updates.
- Integrated **Cloudinary** for image uploads and optimized frontend performance achieving a **Lighthouse Performance Score of 97** through asset optimization, lazy loading and responsive UI design.
- Deployed the application on **Render** and **Vercel** with environment-based configuration and production-grade API architecture.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, Python

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend & APIs: Node.js, Express.js, REST APIs

Database: MongoDB

Tools: Mongoose, Git, GitHub, Postman
